The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Division and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Statement of Water Division and Use must be filed by preparation and pre-1914 appropriative water users as set forth in Water Code section 500 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their divisions, and (3) assists the State to determine if additional water is available for future appropriators.

An appropriate right is required for use of water riparian and non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian users. Since 1914, new appropriators have been required to obtain a permit and license from the State.

A water source and must never have been served from the water supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from another, or other "foreign" water to the natural stream system.

There are two principal types of surface water in California. They are riparian and appropriative rights.

We have several pamphlets available. They include: (1) Statement of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Statement of Water Diversions and Use must be filed by January 1 and per 1914 appropriate water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

An appropriate right is required for use of water on nonirrigation land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his property. Riparian rights must be used in the same manner as the water source and serve water to the sources of supply by an intervening parcel without reservation rights to the stream. Generally, a riparian owner must share the water supply with other riparians.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. A riparian right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only where there is a supply not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

An appropriative right is required for use of water which originates in a different watershed, or return flows from use of groundwater.

Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

Parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

Statements of Water Diversions and Use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement from their diversion, and (3) assists the State to determine if additional water is available for future appropriators. (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation of water diversion, and (3) assists the State to determine if additional water is available for future appropriators.
